PowerDVD Copy

CyberLink PowerDVD Copy is a specialized tool for copying DVD movies from disc or hard drive onto a back-up DVD. You can likewise create a DVD folder on your hard drive, or burn it to a DVD as a movie. Easy-to-select options and an uncomplicated interface simplify the DVD-copying process.

PowerDVD Copy's Main Features

PowerDVD Copy's main features include the following:

- Support for DVD-R/RW and DVD+R/RW discs.
- Compression of DVD9 movies onto DVD5 discs.
- Support for customized disc capacity.
- Disc and title preview.
- Selection of specific DVD movie titles from source disc.

System Requirements

The system requirements listed below are recommended as minimums for copying DVDs.

Minimum System Requirements

OS	Windows XP/2000/ME/98SE (Windows XP/2000 recommended)
DirectX	Version 9
Screen Resolution	800x600 pixels or above
Memory	128MB (256MB recommended)
CPU	Intel Pentium 3, 500 MHz or above or compatible CPU
HDD Space	40 MB for setup 5-9GB of working space
Burner	DVD-R/RW, DVD+R/RW burner

The PowerDVD Copy Program

When you first open PowerDVD Copy, the program appears as follows:

The PowerDVD Copy program displays several buttons and other functions, which are described in the following sections.

Setting Your Preferences

To set your preferences, click . A dialog box opens, in which you can select your preferences from three categories.

Audio Stream Preferences

When you first open the Preferences dialog box, the Audio Stream preferences appear.

This tab allows you to select the audio streams that you want to include on your final DVD. By unchecking unwanted languages, you can filter out unnecessary audio streams, which can save disc space and production time, while ensuring that the languages you want are present.

To create a list of audio streams, open this dialog box, uncheck one or more audio streams, then click **OK**. If you then return to this dialog box and accidentally modify the list, you can reset the list to its previous state by clicking **Restore**. To select all of the listed audio streams, click **All**. To uncheck all of the listed audio streams (and thus deselect them if they are present on the DVD you are copying), click **None**.

Subtitle Preferences

To set your subtitle preferences, click the Subtitles tab.

This tab allows you to select the subtitles that you want to include on your final DVD. By unchecking unwanted languages, you can filter out unnecessary subtitles, which can save disc space and production time, while ensuring that the languages you want are present.

To create a list of subtitles, open this dialog box, uncheck one or more subtitles, then click **OK**. If you then return to this dialog box and accidentally modify the list, you can reset the list to its previous state by clicking **Restore**. To select all of the listed subtitles, click **All**. To uncheck all of the listed subtitles (and thus deselect them if they are present on the DVD you are copying), click **None**.

Project Preferences

To set your project preferences, click the Project tab.

Enter a folder for use as the project's working directory, or click  to browse to the desired location. (The working directory is where the program saves temporary files while working.)

Selecting a Copy Source & Destination

You can copy to and from disc drives or hard drive directories.

To set a source or destination drive, select it from the drop-down boxes. To set a source or destination folder, click  to locate the folder on your computer.

Note: Your source movie must be in DVD-Video format.

You may fit the movie precisely to the size of the DVD you are using by checking the **Auto fit** option. To set a custom disc capacity, select the **Customize...** option. In the dialog box that opens, enter the capacity of the DVD you want to use, then click **OK**.

Previewing DVD Titles

After you have selected your source, you can preview the titles it contains in the preview window to ensure which titles you want to copy.

The controls in the preview window are the same as those on a normal DVD player:

- Press  to play titles. Press  to stop playback.
- Press  to skip to the previous chapter, or  to skip to the next chapter on the DVD.
- Press  to rewind, or  to fast forward.

The current video timecode position is displayed in the box in the bottom right-hand corner.

Selecting DVD Titles

To display options for selecting specific DVD titles to copy, click . This page allows you to select the titles that you want to include on your final DVD. You can even select specific audio streams and subtitles contained in the DVD's titles and main menu.

Click inside the Content box to display the titles and menu on the current DVD.

Uncheck any titles that you do not want to include on your final DVD. If a title or menu contains audio streams or subtitles, these appear in the boxes on the right-hand side.

Uncheck the audio streams and subtitles you do not want to include when you copy the DVD. (Those that remain checked will be included on your final DVD.)

Click  to return to the main page.

Copying a DVD

To begin the DVD copy process, click . The Make Production dialog box opens, displaying the real-time progress of the copying process.

When the copy process is complete, a message appears, alerting you to this fact and asking if you want to save the temporary files that are created during the burning process. (These files constitute a DVD folder that can be played using DVD playback software, such as CyberLink PowerDVD.) Click **Yes** to save the files or **No** to close the message box without saving the temporary files.

Technical Support

Before asking CyberLink for technical support, please refer to this user's guide or online help for information. It contains all the information you generally need to use the program. You may also find answers quickly by contacting your local distributor/dealer.

If your problem is not resolved using the above methods, please feel free to contact CyberLink for technical support.

Web support

Solutions to your problems are available 24 hours a day and at no cost on our Web sites:

support.gocyberlink.com

www.gocyberlink.com

In addition to frequently asked questions, we also provide troubleshooting techniques, the latest in product news, and other relevant information.

Fax support

Use our fax support number to get technical support quickly without spending time on the phone:

(886) 2-8667-1300

Note: Technical support is only offered to registered users, so please make sure to include your **CD-key** (located on your CD case) when faxing.

Telephone support

You are welcome to call the CyberLink's Technical Support Hotline at the phone number listed below during hours of availability:

CyberLink Technical Support Information

Support Phone Number **(886) 2-8667-1298**

Support Hours **9:00 a.m. -5:00 p.m.** Taiwan time (GMT +8:00)
Monday to Friday, excluding holidays

Note: Technical support is only offered to registered users. Please be sure to have your **CD-key** (located on your CD case) on hand when calling.

When calling for support, please have your computer ready and provide us with the following information:

- **your registered CD-key**
- the product version
- the version of Windows installed on your system
- the hardware devices on your system and their specifications
- the wording of any warning messages that were displayed (You may want to write this down or make a screen capture.)
- a detailed description of the problem and under what circumstances it occurred
